SINGLE REVIEW: Heaven Sent Delinquent (Electric Single Mix) by Shawna Virago

By Javier Zepeda 09/20/20

We love being trailblazers in the music industry, but we also love covering trailblazing artists that want to completely revolutionize the industry as a whole. We have our very first transgender artist come into the scene, ready to take on the music industry. We have a cult solo acoustic artist Shawna Virago releasing her latest single, "Heaven Sent Delinquent (Electric Single Mix)" and let us tell you, mind blown! This is the anthem for all of us who feel like outsiders looking in, those who are too timid or restrained by society to truly let yourself shine. No more! This track goes against the quid pro quo, goes against the hyper-religious that always think their point is the correct one instead of actually listening to others.

Shawna is determined to blaze a path to not only her own journey, but many of us who feel are under the same shackles of restraint. We cannot let ourselves be bogged down – nay, yell at the top of your lungs “Heaven Sent Delinquent” and feel the weight drop off of your shoulders because it is no longer your burden to keep secret, but to share and rejoice.

Now, we are saying that this is new for us because we have not had a transgender artist in our platform yet but make no mistake, Shawna has been the transgender music pioneer that she is since the early 90’s! Yes, you heard that right, the early 90’s. The fight started long before this magazine and it’s going to continue but now with us behind it. Virago is the voice before these new celebrities – it’s not a trend, but it’s an anthem that needs to be celebrated.

In our world today, it seems that all hope is lost, but we want to state that “Heaven Sent Delinquent (Electric Single Mix)” is about hope – we need to channel ourselves to escape these oppressive times and show the world that we are who we are and will always be.

Listen to “Heaven Sent Delinquent (Electric Single Mix)” by Shawna Virago below!
