Single Review: Shawna Virago - "Heaven Sent Delinquent (Electric Single Mix)"

Shawna Virago returns with a rocking new single

Transgender singer-songwriter, [Shawna Virago](#), is back with a new single, an electric version of her song "Heaven Sent Delinquent." Virago is something of a pioneer. While transgender people are typically more accepted today, she has been an "out" performer since the early 1990s, long before social media and celebrities made it "cool." The song deals with some of the struggles she faced coming from an oppressive town.

While Virago has been called anti-folk and punk, this song has more of a mid-tempo, almost Rolling Stones vibe to it, with its laid-back vocal and Keith Richards-esque chord changes. The video is a slice of Americana, showing Virago in small town America. The track is at once political and catchy and worth checking out.
